CAREER OBJECTIVE

Motivated Computer Science Engineering student with strong interest in learning new technologies and building practical applications. Skilled in Python, web development, and problem-solving with the ability to work effectively in a team environment. Seeking an opportunity to enhance technical skills, contribute to organizational growth, and gain professional experience in the software industry.

EDUCATION

BTech (Computer Science and Engineering) Kuppam Engineering College Kuppam o Scored: 80%	2026
Intermediate (XII MPC) Sir C.V Raman Junior College Anantapur o Scored: 88%	2022
SSC (x) Z.P High School Gutturu o Scored: 95%	2020

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-Learn, Flask
Web Technologies: HTML, CSS, React.js, Node.js
Databases: MySQL
Developer Tools: VS Code, Git/GitHub, Jupyter Notebook, Google Colab

PROJECTS

Geospatial Intelligence and Machine Learning Integration for Automated Retail Site Selection | Python, Flask, Scikit-learn, Folium

- Developed an AI-based retail site selection system using Machine Learning to predict business success based on population, income, traffic, rent, and competitor analysis.
- Built a Flask web application with interactive Folium maps to visualize high, medium, and low-potential retail locations using color-coded zones.
- Integrated real-time Google Maps competitor data using SerpApi and implemented a Random Forest model for accurate retail success score prediction.

AI-Based Resume Screening System | Python, Flask, NLP, PDF Processing

- Developed an AI-powered Resume Screening System using Python and Flask to automate resume analysis, skill extraction, and candidate shortlisting based on job requirements.
- Implemented PDF resume parsing and skill matching techniques to compare candidate skills with required job skills and generate matching scores automatically.
- Built an admin dashboard for resume upload, candidate ranking, and selection status visualization, reducing manual HR screening effort and improving recruitment efficiency.

- Developed a full-stack online learning platform for course enrollment, progress tracking, and user management using the MERN stack.
- Implemented secure authentication and role-based dashboards for Admin, Teacher, and Student modules.
- Designed RESTful APIs using Node.js and Express.js and managed course, user, and enrollment data with MongoDB.
- Built a responsive and user-friendly interface using React.js and Bootstrap for seamless learning experience.

INTERNSHIPS

Rooman Technology

May 2025 – July 2025

Completed an internship as an AI Data Quality Analyst Intern at Rooman Technology, where I worked on data cleaning, preprocessing, validation, and analysis using Python. During the internship, I applied machine learning fundamentals on real-world datasets to identify patterns and improve data quality accuracy. I also collaborated with team members on project tasks, which strengthened my analytical, problem-solving, and teamwork skills while gaining practical exposure to AI and data analytics workflows.

CERTIFICATIONS

2025	Ai Data Quality Analyst • Successfully completed and received certificate from Rooman Technology
2024	NPTEL Online Certification on “Data Analysis & Decision Making-III” • Scored: 58%
2023	Participation Certification on “Python Programming Workshop” • Workshop participation certification from APSSDC
2025	Full Stack Development (MERN) • Successfully completed and received certificate from SmartBridge
2026	Python Programming • Successfully completed and received certificate from SkillDzire

CO-CURRICULAR

- Participated in Techno-cultural events at Kuppam Engineering college
- Participated in various technical symposium events held at Burgur
